Curious About "Hello World"?

Learn the basics of Computer Science and develop strong fundamentals TODAY!

In Global Light Academy's Introduction to Computer Science Course, we will:

- Learn syntax in coding language of YOUR choice

- Develop strong foundations for good code

- Prepare you for AP Computer Science

- Help you with any computer science course in school

Students who take our Introduction to Computer Science Course will:

- Develop a genuine interest for Computer Science while being prepared for high school and college classes

- Have an in-depth understanding of data structures, algorithms, computer science theories, abstraction, and much more

Students who do not take our Introduction to Computer Science Course may:

- Disregard Computer Science as a career choice/uninteresting subject due to its innate difficulty

- Fall behind in school classes without proper guidance and individualized learning experiences
